DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2 and 14-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term “apparent thickness” is indefinite as to whether the actual thickness of the yarns is being claimed.

Re claim 18, the term “the different course” is indefinite as it lacks clear antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patent document 11-279907

As seen in figures 1 and 2, Japanese patent document 11-279907 teaches a warp knitted elastic fabric including a base knitted fabric warp knitted from main stitch yarns; main elastic yarns knitted in the base knitted fabric in a continuous line in a selected one of the knitting width

direction and the knitting length direction the main inserted yarns a being more bulky than both the main elastic yarn and main inserted yarns and said main inserted yarns being thicker in "apparent thickness" than both main elastic yarns and main inserted yarns.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 2 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent document 11-279907.

Japanese patent document 11-279907 teaches the invention substantially as claimed as indicated above in the rejection to claim 1. Japanese patent document 11-279907 does not set forth a mesh like fabric with openings. It would have been obvious at the time the invention was made to provide the fabric of Japanese patent document 11-279907 with mesh like fabric

openings in order to provide ventilation and cooling. Re claims 14 and 15, Japanese patent document 11-279907 does not set forth a chenille type bulky yarn and the specific elastic yarn. It would have been obvious at the time the invention was made to provide the bulky yarn as chenille and the specific elastic yarns as claimed since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
